

Education For The 21st Century

Vision, Mission, Shared Values: a common ethos

Vision Statement: 'To Be The Best You Can Be'

Mission Statement: To enact our vision the core principles of our mission are:

- Opportunities for all
- Highest expectations for all
- Effective support for all
- Social inclusion for all

Shared Values: To support our mission we have a set of shared values:

1. High Expectation

We encourage all our students “to be the best you can be.” It is our motto and articulates the aspirations we aim to instil in our students.

3. Passion

A good education can change lives. As educators, we are in a position to positively influence our student’s lives; we do this by being the best we can be for each child.

5. Responsiveness

Each school is individual, and represents and responds to the needs of its community through its local Governing Body.

2. Right First Time

We have one chance to provide children with high quality education, so we concentrate our efforts and get it “right first time.”

4. Positivity

The Trust’s schools work a ‘no excuses’ culture, dismantling learning barriers. We go the extra mile to support our students positively.

6. Collaboration

Trust schools collaborate to develop autonomous, self-improving schools, which drive for improvement through professional challenge and support.
